## SUMMARY

In my years in the workforce so far I have gained many skills that I use daily. I have learned valuable people skills as well as business management when I've worked mostly in the role as contractor or employee for Comcast, Cablevision, Square D, Staples, and AT&T.

I am very technically able with telecommunications and electrical devices. I am a fast learner and I always look to go above and beyond the expectations placed on me. Though this is what most of my experience consists of; what I would really like to work up to one day is Travel Photography. Just to be able to travel the world and capture images and video of remote breathtaking locations while getting paid for me would be a dream!
